Operation Process

- 1.Scan the barcode ticket or read parking card which is dispensed at the entrance machine. If it is ANPR car parking system,just input your license plate number for payment.
2. The 22" HD LCD touch screen will show how much you need to pay
3. Pay as the machine 's payment methods. You can combine several payment methods to pay parking fee.
4. After payment, a receipt is printed. The parking system allows 5-15 minutes for leaving the parking lot after payment. The time can be set by yourself
5. Scan the bar code ticket or reading parking card at the exit machine, then the barrier will open automatically. If it is ANPR parking system, you can leave the parking lot without stop.

Product details

Characteristic

Distance Control by Internet

The parking meter is connected with Internet. The administrator can control the machine in his office. He can set or change all the parameters of the machine in his computer, and get all the statistical data of the machine and all kinds of reports in his management software.
