

Auto solar powered remote control personal parking barrier parking lot lock

Lock your car insurance, solve all kinds of troubles the owner of the parking space is occupied. When the master driving car to the parking, lightly press the remote parking lock will automatically rise, Changed the traditional way to get off the manual switch, easy to master technology with high quality of life.

- ◆ Remote controllable , activated or deactivated without the need to get off driver's vehicle
- ◆ Embedded battery is chargeable with electricity , long battery life.
- ◆ Robust design to withstand pressure by weight up to 3,000 kilograms.
- ◆ Giving out warning signs to alien drivers while triggered by the pressure of vehicle coming over.
- ◆ Waterproof , ideal for outdoor use.

What is the standard of Choosing a parking space lock?

Anti-pressure design

Anti-collision design

Water-proof design

Remote control design

1. Protect your parking place from being occupied. Easy to use
2. Charge automatically under solar (optional)
3. Circuit protection: with reliable MCU and IC circuit intelligent control
4. Durable: Bearing weight up to 5 ton, the heavy weight loading on it , it won't be out of shape and destroyed
5. Waterproof ,rustproof
6. Reset function: when go down or go up, meet the resistance from the outside force, it 'll reset itself, going to the original way, so that protect the control panel's function
- 7.Noise-free: bearing transmission design of the motor makes almost zero noise. It is beneficial for battery and motor longevity and lesser friction
- 8.Theft-proof: the mounting bolts are installed inside of the cabinet. No one can open it without key
- 9 Easy installation: four prepared holes at the bottom of the cabinet makes it easy to install.parking lot

10 Manual operation: to operate the parking locks rising and going down manually with manual at emergency situation.

11. Alarm function: when overloading, over voltage and coming across hamper

12 .Feasibility: suitable for all parking place and all kinds of car.

Item	Solar Type parking lock
	90° series / 180° series
Feature	Solar Panel . Automatic alarm, power off automatically, waterproof
Battery	Lead acid Battery OR Lithium Battery
Charging mode	Solar (Optional)
Ascending Height	320mm / 420mm
Descending Height	75mm
Remote Controlled Distance	≤30m
Up or Down Time	5S ~ 6S
Environment Temperature	-30℃~+55℃
Weight	8Kg ~ 11Kg
Packing size	505×498×145mm
