

## Entry barcode ticket dispenser car parking access control system

COMA offers a reliable range of automatic access control systems tailored to car park application. The integrated solutions include ticket systems, card system, Automatic Number Plate Recognition (ANPR) or bluetooth card parking system. A well designed car parking system can be a successful revenue generator.

Entry barcode ticket dispenser car parking access control system, is applied to parking lot with a lot of visitors. The cost of barcode ticket is reasonable, and can dispense up to 2,500pcs of bar code ticket for one refill.

The visitor presses the button to get a bar code ticket, then before leaving, visitor passes the bar code ticket to the toll collector for scanning. After scanning, the parking fee is shown on the computer. After payment, the visitor is allowed to leave.

### Parameter
